SABARIVASUDEV K

JUNIOR SOFTWARE ENGINEER

Coimbatore, Tamil Nadu +91-8220909728 sabarishibu2746@gmail.com GiitHub

PROFESSIONAL SUMMARY

2025 B.E. Electronics and Communication Engineering graduate with hands-on expertise in backend software engineering, specializing in Java 21 , Spring Boot, Spring Security, microservices architecture, and relational database systems. Proficient in designing scalable RESTful APIs, implementing robust authentication systems, and building high-performance server-side application logic. Solid foundation in database design, automated unit testing, CI/CD pipelines, and Git workflows. Seeking a Junior Software Engineer position to contribute to mission-critical backend services and scalable web solutions.

EDUCATION

Hindusthan College of Engineering and Technology — **Coimbatore, Tamil Nadu**
Bachelor of Engineering – Electronics and Communication Engineering — *2021 – 2025*

Nirmala Matha Convent Matriculation Higher Secondary School — **Coimbatore, Tamil Nadu**
Higher Secondary Certificate (HSC) – 2021 | Secondary School Leaving Certificate (SSLC) – 2019

TECHNICAL SKILLS

Core Java & Enterprise Java: Java 21 , OOPs, Data Structures & Algorithms, Design Patterns, J2EE (Servlets)

Backend Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security

APIs & Microservices: RESTful APIs, Microservices Architecture, API Gateway, Eureka Server, OpenFeign, Resilience4J, Swagger/OpenAPI

Databases & Querying: Oracle SQL, MySQL, JDBC, Relational Database Modeling, Query Optimization

Security & Build Tools: JWT Authentication, Role-Based Access Control (RBAC), Maven, Git, GitHub, Postman

DevOps, Testing & Quality: Docker Containerization, JUnit, Mockito, CI/CD Basics, SonarQube, Agile Methodologies **Web**

Basics & Integration: HTML5, CSS3, JavaScript, React.js (API Integration)

PROJECT EXPERIENCE

Home Service Management Platform (Backend Microservices System) — **June 2026 – July 2026**

Tech Stack: Java 21 , Spring Boot, Spring Security, Spring Data JPA, Eureka, OpenFeign, JWT, Oracle SQL, Docker, Maven, Postman

- Architected and implemented a distributed microservices backend platform for scalable home service bookings, payment orchestration, category cataloging, and administrative analytics.
- Designed, integrated, and documented secure RESTful APIs utilizing Swagger/OpenAPI to standardize service interfaces and facilitate seamless client integration.
- Enforced enterprise-grade security protocols using Spring Security and JWT with Role-Based Access Control (RBAC) to ensure stateless and authorized end-point execution.
- Configured Spring Cloud Eureka Server for service discovery, OpenFeign for declarative inter-service communication, and an API Gateway for unified routing and cross-cutting concerns.
- Persisted domain objects via Spring Data JPA and Oracle SQL, optimizing relational schemas and query performance for high-throughput transactions.
- Containerized backend services using Docker, ensured code reliability with JUnit and Mockito unit tests, and maintained continuous code quality standards via SonarQube.

FULL STACK & ENGINEERING CORE

- Completed over **50+ hands-on practice projects** and programming challenges, building custom backend modules, REST APIs, database tools, and algorithmic solutions.
- Solid foundation in modern enterprise Java development, core object-oriented software design principles,
